

"TRAIL-TRUE" leads the field

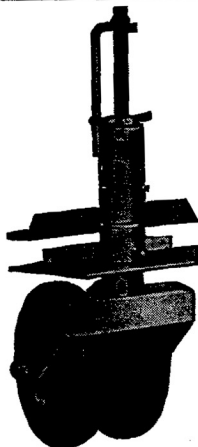

Reg. U.S. Pat. Office

**There is a Model
for every size
and type of
House Trailer.**

As near as we can tell, most new "Trail-Trues" are chosen and installed today upon recommendations of owners. They are so well pleased with the soft, smooth, oil-cushioned, hydraulic ride, without bobbing or swaying, that they are enthusiastic when asked about it. Also, they like the convenience of the Lifting Screw, in hitching and unhitching, adjusting weight on tow car and levelling trailer when parked. Above all, they like the fact that "Trail-True" cannot "jackknife" at any time.

The first "Trail-True" Dollies are in their seventh year of service. Since then, thousands of "Trail-Trues" have traveled millions of miles, with complaints on performance, material or workmanship conspicuous for their absence.
