

The nature of energy.™

LW3000 PLUS

Dometic Digital Inverter/Generator

Dometic has the perfect answer for all your power needs at home, at the beach, work — anywhere. The LW3000 Plus is a reliable, energy-efficient Digital Inverter gasoline generator capable of electrifying all your power needs and more.

- Lightweight — 24 percent lighter than comparable models
- Quiet, air cooled four-stroke engine
- Energy efficient — 15.4 percent more fuel capacity
- Strong enough to power a 13,500 BTU air conditioner
- Long run time — up to 10 hours, depending upon the load

 Dometic

Inverter technology

Dometic's state-of-the-art portable generator know-how moves energy production to a new level with Digital Inverter technology. Our unit is smaller, lighter and more energy efficient thanks to advanced technology. The LW3000 Plus automatically adjusts engine power to run at the required RPM to power load needs. The unit quietly meets your energy requirements while saving on fuel.

Multiple uses equals greater value

Marine

Did you ever think you'd want or need more power dockside for your boat or pontoon? If so, Dometic is the answer. Satisfy your power needs for up to 10 full hours for total enjoyment.

Work

Inverter/Generator is rugged enough to handle heavy construction zone workloads. The high impact outer casing protects the generator in tough job site conditions. Crews stay on the job for up to 10 hours with power to spare, depending upon the load.

Home

Do-it-yourself outdoor projects around the home are easier with the LW3000 Plus. Electric start is standard so you can save your energy for the important work. And it's quiet so you won't disturb your family or friends.

Leisure

When it comes to relaxing our generator makes the fun that much more enjoyable. Take it along to outdoor sports events, to the lake or even on your pontoon boat. Quiet, reliable, long-lasting power is yours when and where you want it.

Features

- 1 Lightweight — 24 percent lighter than comparable models
- 2 Efficient — 15.4 percent more fuel capacity
- 3 Electric start is standard
- 4 Quiet, air cooled, four-stroke engine
 - Two AC and one DC outlets
 - DC circuit breaker
 - Overload indicator (red)
 - Output indicator (green)
 - Engine alert oil system
- 5 Ergonomic pull handle and wheels for easy transport
- 6 Smart Throttle minimizes fuel consumption
- 7 High impact outer case

Emergency

Emergency power is never a problem with the LW3000 Plus. The electric starter is standard so you concentrate on the important tasks around the house. Sine wave technology means a safe, consistent power flow for your most sensitive appliances and even computers.

- **Energy efficient Smart Throttle** automatically adjusts the engine speed to generate just the right amount of power for the job at hand
- **Air flow fuel cap knob**
- **Quiet, air cooled, four-stroke engine** minimizes noise for family and friends comfort
- **Engine oil alert system** automatically stops the engine before oil levels can fall below safe limits
- **Easily powers a 13,500 BTU air conditioner**
- **Consistent power** load means you can use sensitive computer equipment with total peace of mind. Perfect for printers, computers, audio equipment and telephone
- **Clean, stable power** for all home or work applications

Stable, consistent power is the standard for Dometic's LW3000 Plus Digital Inverter/Generator

But how does it really work:

Dometic engineers crafted the alternator to produce high voltage, multiphase AC power. This power is then transformed to DC power. Then the inverter converts the DC power back to AC power. In addition, the inverter controls the power for an even,

smooth flow to all electrical appliances, including sensitive computers.

The end result is a Digital Inverter/Generator that is lightweight, fuel efficient and able to deliver reliable power for extended periods. That is just what you'd expect from the creative team at Dometic.

Specifications LW3000 Plus*

Weight	59 lbs.
Color	Black
Power Output	120V/60Hz
Engine	Air-cooled, Four-stroke
Fuel	Gasoline
Fuel Capacity	Seven Liters
Receptacles	Two AC, One DC
Rated AC Output (KW)	2.6
Max AC Output (KW)	2.8
Packing Dimensions (mm)	600 x 335 x 515

*Use in well ventilated spaces.
