

RV Power Systems Chart

David S. Wile

Notes:

- Remotely controlled device plugs draw standby current
- Automatic control linking inverter and converter on AS
Made by Tripp Lite or Magnum
- Charge controller in AS is single stage – want 3 stage
- RoadTrek units also have LP feed to refrigerator

Scenarios:

- Parked and stored: turn off LPG relay, unplug RC devices
- Shore power overnight, no generator if using lots of Power
- Undocked
- Fueling: turn off water heater and heater pilots.
